Stackable Poly Tanks

Purchase Fluids in Bulk: Reduce Total Fluid Expenses and Eliminate Waste from Packaged Goods & 55 Gallon Drums.

Stackable Tank Construction

- Constructed from UL Rated Food-Grade Polyethylene Resins
- Convenient and Easy Fill Tank Designs
- Translucent Tank with Fluid Level Markers
- 2" Fill Port(s) Located on the Top of Each Tank
- Bottom Stainless Steel Dispense Fittings
- Secure Tank Stacking with Interlocking Top and Bottom Points
- Extra Strength Corrugated Side Walls

Stackable Tank Storage & Handling Solutions

Our Space-Saving Multi-Fluid Storage and Handling Solutions are Backed by Decades of Reputable Industry Experience

Maximize Valuable Floor Space

Space saving stackable fluid storage and handling systems can open up valuable floor space to allow for additional revenue-producing shop work space or the expansion of the number of service bays.

Eliminate the Hassles of 55 Gallon Drums

- Messy clutter
- Down-time moving drums
- Unused product
- Potential Contamination

Flexibility to Move Fluids Throughout Your Shop

Convert a stationary system into portable storage with caster wheels to point-of-use dispense. Simply roll the system to the service area, attach air or electrical connections, and you can service multiple bays.

Ensure EPA Compliance With The Latest SPCC Plan Regulations

Our secondary containment vessels provide an excellent secondary barrier between the tank and the environment. Primary tanks combined with secondary containment provide a clean, space saving solution to meet SPCC guidelines and 40 CFR 264.175 requiring 110% capacity of the largest primary tank within a stack or 110% capacity of a single primary tank within the containment.

A Refillable Bulk Storage System Is a One-Time Investment That Stores and Handles Oils and Automotive Style Fluids

Roth Double Wall Tanks

Double Wall Construction for Ultimate Safety & Reliability

Construction

- The outer tank is made of leak-proof, weld-free galvanized steel and is roll-seamed with an oil and fire-resistant seal. It can contain up to 110% of the capacity of the inner tank for maximum protection.
- The inner tank is made of blow-molded, high-density, seamless polyethylene that is leak proof and will never corrode.

Double Wall Benefits

- Use for Class II and Class III fluids including: heating oil, motor and gear oil, hydraulic fluids, ATF, brake or power steering fluids, ethylene or propylene glycol based anti-freezes, diesel and bio fuels.
- Outer tank holds 110% of inner tank for maximum protection.
- Compact, economical design with (4) 2"NPT Openings (8 sq. ft for 275 gallon).
- Up to 50% lighter than a 12-gauge steel tank with larger storage capacity.
- Zero fittings below the fluid line.
- Wide handles allow easy handling.
- Leak-proof and will not corrode.

Certified to UL SU2258 and designed to store liquids that are classified as class II or class III combustibles. Roth Double Wall Tanks are compliant with NFPA 30 & 30A, subject to building code approval by a local authority having jurisdiction.

UL 2085 Aboveground Fireguard Tanks

Double Wall Cylindrical Fireguard Tanks are UL 2085 Listed, Feature UL Approved Saddles & are Painted with a White Urethane Top Coat

Fireguard Tanks; The Only Tank That Meets All Of These Standards:

- UL 2085 Listed "Protected" Tank
- Impact and Ballistics Protection per UL 2085
- Both the inner and outer steel tanks are built to UL standards
- National Fire Protection Association (NFPA) 30 & 30A
- International Fire Code (IFC)
- California Air Resources Board (CARB) Standing Loss Control testing requirements for air emissions
- Steel Tank Institute (STI) Standard F941 for Thermally Insulated Aboveground Storage Tanks

Standard UL 2085 Cylindrical Fireguard Tanks

Part No.	Capacity	Dimensions	Empty Weight
SDW500PDFG	500 Gallons	54" Dia x 70" L	Appx 2,500 Lbs.
SDW1000PDFG	1000 Gallons	54" Dia x 136" L	Appx 5,500 Lbs.
SDW2000PDFG	2000 Gallons	64" Dia x 144" L	Appx 10,000 Lbs.

Fireguard Tank Features:

- Capacities up to 15,000 gallons, with fast production for the 500, 1,000 and 2,000 gallon Fireguard Tanks. Request an estimate for other tank capacities.
- Compatibility: Primary storage tank and secondary containment are compatible with a wide range of fuels and chemicals, including biodiesel and ethanol.
- Insulation: The Fireguard lightweight monolithic thermal insulation material is a specialized concrete that is part of a patented process resulting in a lighter material weight than concrete alone. Stored fluid is insulated from ambient temperature variations, resulting in reduced vapor emissions and product loss.
- Tank Testing: Primary and secondary tanks can be tightness tested on-site with standard procedures, and the interstitial space can be monitored for inner tank leak detection.
- Double Wall Tank: An impermeable, crack resistant steel outer tank encloses the concrete encased inner primary tank. The steel outer wall provides added strength and protection from weathering, low cost maintenance and is easily recycled.

Work Bench Tanks

The Ultimate Solution for Efficiently Storing and Dispensing Automotive Fluids and Lubricants in Confined Shop Applications

Conveniently Enclose 2, 3, or 4 Tote-A-Lube Tanks Contained in a Secondary Containment Vessel.

The Work Bench is complete with a 69" x 36" powder coated work surface which will remain clean and free of oil residue, as the tanks' fill ports are located below the work area. It is equipped with a universal side shelf that mounts Graco's dispense equipment, giving you the ultimate in fluid storage solutions for confined spaces.

Dispense packages and custom configurations are available upon request.

Heated Tank Blankets

Provides Even Heat for Temperature Sensitive Applications

Once Fluid Reaches the Desired Set Temperature, the Insulated Heated Blankets Maintain Temperature, Even in the Most Challenging Applications.

Features

- Constructed of 18oz NFPA Certified Flame Retardant Vinyl (Also Water, Wear and UV Resistant)
- High Efficiency Carbon Heating Grid Evenly Distributes Heat
- Heating Element Decreases Current as Temperature Increases
- Integrated GFCI is Hard Wired into Blanket
- Adjustable Retaining Straps with Quick Release Buckles for an Accurate Fit
- Fully Welded Seam Seals all Vinyl Perimeters

DOT Approved Refueling Tanks

Dot-Approved Tanks Up To 110 Gallons For Gasoline, Diesel, Methanol, Aviation Fuel, & Kerosene.

Perfect for fleets, farms, & service professionals, Aluminum Refueling Tanks are pump-ready & legal, manufactured here in the USA in 36 to 110 gallon capacities. Each Tank meets strict federal safety standards for private, commercial, and state use. DOT Approved & legal in all 50 states for on-vehicle refueling for gasoline, diesel, methanol, aviation fuel, and kerosene.

Each Refueling Tank is constructed from rugged diamond plate aluminum and comes with a 3/8"NPT drain plug, (2) 2"NPT bungs, a vent/prevent cap, and fully welded baffles to reduce slosh and add strength. Transfer Pumps are optional.

		L-Shaped Refueling Tanks Designed to pair with crossover or chest-style toolboxes, the lower L fuel tank section fits neatly beneath most standard boxes. Dual 2" bungs for flexible pump placement.

	WO647016DPP	Graco 1050 Diaphragm Pump (1", 50gpm), Funnel & Hose Kit. NOT Included: Roth Double Wall Tank, Level Gauge and Mounting Bracket.		
	Graco Oil King and Coolant King			
	Polyethylene Tank Features Large Funnel, Tool Holders, Sight Gauge, Used-Filter Tray, Removable Filter Screen, 3" Buttress Inlet Port, 3/4"NPT Outlet			
	WFG238866	Oil King (Black)	25 Gallons	Adjustable Height 45" to 69". 24"W x 24"L.
WFG248632	Coolant King (Green)	25 Gallons		
	Self Evacuation Portable Oil Drain			
	Includes auto-check technology for easy and automatic drain evacuation. Steel tanks have a 4-caster design, 16"OD funnel and pressure relief safety valve.			
	WOJD18DC	6' Discharge Hose.	18 Gallons	Adjustable Height 36.5" to 59". 42 Lbs.
	WOJD25DC	Heavy Duty Model with a Sight Glass, Molded Poly Tool Tray, & 6' Discharge Hose.	25 Gallons	Adjustable Height 50" to 70". 85 Lbs.
	Truck and Tractor Low Profile Oil Drain			
	Constructed of rugged steel and has an expanded metal shield for reduced splash, 10" ground clearance, 6" industrial casters and 35" long reach folding T-Handle.			
	WOLP17	Includes a Gate Valve for Gravity Feed. 150 Lbs.	17 Gallons	48"L x 25"W x 10"H
	WOLP25	Includes 110v Electric Pump (Self-Contained) & 10' Evacuation Hose. 160 Lbs.	25 Gallons	48"L x 25"W x 10"H
	Oil and Coolant Drain Pans			
	High-density polyethylene material features a 1"spout, an anti-splash lip and baffle.			
	OTL17972	Oil Drain Pan (Black)	4.5 Gallons	

Samson Used Oil Drains

	FHS3733	18 Gallon Waste Oil Drain with Remote Pump Discharge and Telescopic Bowl.		FHS3720	27 Gallon Waste Oil Suction & Gravity Drain with a 10 Qt. Transparent Chamber and Height Adjustable Collection Bowl, Level Gauge and Anti-Splash Screen.
	FHS3734	18 Gallon Waste Oil Drain with Pressure Discharge and Telescopic Bowl.		FHS3721	27 Gallon Waste Oil Suction with a 10 Qt. Transparent Chamber and Height Adjustable Collection Bowl, Level Gauge and Anti-Splash Screen.
	FHS3731K	18 Gallon Waste Oil Suction Drain with 10 Qt. Transparent Chamber and 8 Piece Wand Kit.		FHS3723	27 Gallon Waste Oil Drain with Remote Pump Discharge and Height Adjustable Collection Bowl, Level Gauge and Anti-Splash Screen.
				FHS3724	27 Gallon Waste Oil Drain with Pressure Discharge Features a Telescopic Bowl.

Dispense Containers and Funnel Kits

Oil Safe Dispense Container		Funnels and Funnel Kits						
	OSD10	Industrial Grade Drum, 10 Quart/Liter		OTL24970	Spill-Free Coolant Funnel Kit Includes cap for VW, Audi and Porsche overflow tanks with threaded caps. Colored adapters for quick ID. 7"W x 9"D x 7"H			
	OSD5	Industrial Grade Drum, 5 Quart/Liter						
	OSL25	Oil Safe Lid, 1" (25mm) Nozzle		OTL19342	Multi-Application Funnel 1.6 qt. translucent funnel with (7) color-coded adapters & 45° elbow. 6.5"W x 5.5"D x 7.25"H

Toucan Absorbent Recycling System

Save Time, Reduce Expenses & Efficiently Clean Up Spills. The Toucan Cart Stores, Dispenses, & Recycles Fibercan+ Absorbent From Waste.

Designed for auto shops, industrial workshops, and service operations that demand fast and cost-effective spill management. This rugged, mobile station stores, distributes, and recycles Fibercan+ Absorbent locking in oils, coolants, and fluids the moment they hit the surface, leaving no greasy residue behind for a cleaner workspace.

LIQ-LOCK® Absorbent Technology
Encapsulates Fluid on Contact

Toucan Absorbent Recycling System Features

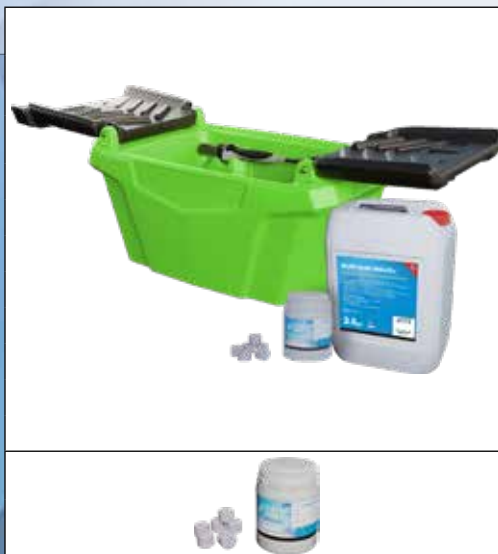

- All-In-One Station Stores, Distributes, & Recycles Fibercan+ Absorbent Efficiently.
- Recycling Sifting System Instantly Separates Soiled From Reusable Absorbent.
- Safe, Reliable, & Eco-Conscious Spill Management.
- Fibercan+ Absorbs Fluids Without Leaving Greasy Residue.

Toucan Absorbent Recycling Bundle	
Includes Toucan Cart and (1) Bag of FIBERCAN+ Absorbent Powder.	
Toucan Bundle	Part No. SRTOU0015B
Overall Dims:	44.1"W x 31.3"L x 25.6"H
Storage Tank Vol.	11.9 Gallons
Weight	52 Lbs.
Waste Tank Vol.	4.8 Gallons
Sifting Grid Dims:	14"W x 9"L / .15" Perforations
FIBERCAN+ Absorbent Powder Refill Bag	Part No. SRFAC001
Lignocellulose absorbent powder traps liquids & eliminates oil and grease residue. Use with Toucan Absorbent Recycling System. 7.9 Gal Refill Bag.	

Ambient Ocean Lagoon Biological Parts Washer

Eco-Friendly & Solvent-Free Portable System Cleans at Room Temperature, Perfect for Mobile Workshops, Powersports, & Off-Road Maintenance

Ocean Lagoon Biological Parts Washer Bundle	
Includes Ocean Lagoon Parts Washer, ClearTabs SRCT, Box of 6 and (1) BlueLiquid SRBLPE+ Aqueous Solution, 2.5 Gal Container.	
Ocean Lagoon Bundle	Part No. SR0014019B
Operating Capacity	2.6 Gallons
Operating Temperature	Room Temperature
Pump Flow Rate	158 GPH
Filtration	Stainless steel filter cup 0.027in
Working Dimensions	19.3"W x 12.6"L x 7.1"H
Overall Dimensions	28"W x 17.3"L x 14.2"H
Unit Weight	20 Lbs
Optional Vehicle Ready Power Source	Vehicle 6V Lighter Socket
ClearTabs (Box of 6)	Part No. SRCT6
Solvent-free cleaning tablet solution removes oils, grease, and contaminants at room temperature. Use with Ocean Lagoon.	

Ocean Lagoon Biological Parts Washer Features

- Portable 2.6 gallon system with dual handles & magnetic lid closure make transport effortless.
- Room-temperature cleaning power combines BlueLiquid & ClearTab microbes to break down contaminants safely.
- Multi-function washer lid holds parts, collects drips, and stores brushes for organized cleaning.

Heated Biological Part Washers

Solvent-Free and Heat Regulated Biological Parts Washers Deliver Heavy-Duty, Eco-Friendly Cleaning

Gravity X2 Mobile Biological Parts Washer	
This 10-gallon mobile system brings biological cleaning directly to the job. It features controlled 100°F heat for safe cleaning of sensitive parts, an ergonomic table and casters for easy transport, with 15-minute cycles for rapid cleaning wherever it's needed.	
Gravity X2 Parts Washer (Bundle Includes Parts Washer, (1) BlueTablet Box of 4 & (2) BlueLiquid SRBLPE+ Aqueous Solution 5 Gal Pails).	Gravity X2 Bundle Part No.: SRGRV0717B
	Gravity X2 Only: Part No. SRGRVE108
Operating Capacity	10 Gallons
Operating Temperature	Low Pressure Heat Regulated To 100°F
Pump Flow Rate	Adj. 0 To 1.58 GPM & Low Flow Tap
Filtration	Bag filter polypropylene 0.002in
Soaking Dimensions	8"W x 8.3"L x 3.1"H / 1 Gallon
Overall Dimensions	32.3"W x 20.9"L x 41.4"H
Unit Weight	50.7 Lbs

Ocean Sunset Biological Parts Washer	
The 26-gallon heated biological system maintains 100°F, with Boost Mode up to 109°F for heavy soils. Features an integrated cleaning table to keeps parts organized, & a 300 GPH circulation pump for consistent flow across all surfaces. A hermetic sealed lid preserves heat and performance. Integrated casters make positioning around the shop effortless.	
Ocean Sunset Parts Washer (Bundle Includes Parts Washer, (1) BlueTablet Box of 4 & (5) BlueLiquid SRBLPE+ Aqueous Solution 5 Gal Pails).	Ocean Sunset Bundle Part No.: SRSUN0623B
	Ocean Sunset Only: Part No. SRSUN6117
Operating Capacity	26 Gallons
Operating Temperature	100°F Standard, 109°F Boost Mode
Pump Flow Rate	300 GPH
Filtration	0.03in Basket Filter + 0.004in External Filter
Working Dimensions	31"W x 16"L x 7"H / 8 Gallons Soaking
Overall Dimensions	36"W x 26"L x 44"H
Unit Weight	88 Lbs.

Blue Tablets (Box of 4)	Part No. SRBT4
Enhances BlueLiquid aqueous solution in biological washers. Extends solution life, reduces sludge, neutralizes odors, & boosts microbial activity to maintain a clean, effective bath. Use with Gravity X2 and Ocean Sunset.	

Solvent-Free Cleaning Solutions

Clean & Remove Grease, Oil, Carbon, & Deposits.

Aqueous Solutions	
Use with Ocean Lagoon, Ocean Sunset, and Gravity X2 Parts Washers.	
	SRBLC275 BlueLiquid SRBLC+ Aqueous Solution, 275 Gal for 5:1 Dilution
	SRBLC55 BlueLiquid SRBLC+ Aqueous Solution, 55 Gal for 5:1 Dilution
	SRBLC5G BlueLiquid SRBLC+ Aqueous Solution, 5 Gal for 5:1 Dilution
	SRBLPE5 BlueLiquid SRBLPE+ Aqueous Solution, 5 Gal Pail - Ready To Use

Ultra-Spill Pallets - Plus, Standard, Economy

Gravity Feed Assembly Instructions

Shown with optional containment vessel

Tools Needed:

- 1/2" wrench or crescent wrench
- 9/16" wrench or crescent wrench
- Utility knife
- Flat head screwdriver
- Channel lock pliers

2 Stackable Tank Assembly Shown

Step 1
Screw threaded end of each pipe leg into couplers on the under-side of stand base.

Step 2
Attach drip tray frame to front legs of stand. Leave ample space below the drain valve. NOTE: When using the 203 Gallon Containment Vessel, do NOT install the drip tray kit. (The vessel has a built-in drip tray shelf). In this case place the assembled stand inside the vessel & continue to step 4.

Step 3
Place drip tray pans and screens into the drip tray frame spaces. NOTE: Handle drip tray screens with care, outside edges are sharp. We recommend wearing gloves when handling drip tray screens.

Step 4
Attach elbow kit(s) to front lip of the stand base, using 1/2" wrench. Repeat as necessary.

Step 5
Stack all tanks on the stand. Tanks will interlock snugly, resisting any pressure front-to-back, or side-to-side.

Step 6
Install valve directly into bottom tank 1" NPT drain port. Install additional valves into 1" NPT Elbow kit opening on stand.

IMPORTANT: DO NOT OVERTIGHTEN. HAND TIGHTEN ONLY.

Step 7
Install a poly elbow into each upper tank's 1" NPT drain port. Angle each poly elbow to a 5 o'clock position, aiming to its installed corresponding stand elbow kit.

Step 8
Install a poly union into each elbow kit on the stand. Elbow kits are naturally angled at an 11 o'clock position, allowing a natural path for the tubing to follow, preventing potential kinks.

Step 9
Cut to clear length poly tubing. Secure a hose clamp on each end and attach tubing to barbed ends of poly elbows and poly union(s).

NOTE: All threaded fittings must be coated with thread sealant to prevent leakage.

Stackable Tank Gravity Feed Assembly Instructions

Tools Needed:

- Flat-head Screwdriver
- Pipe Wrench
- 9/16" Wrench

Components:

- (2) Tanks
- Steel Stand
- Drip Tray Assembly
- Gravity Feed Kit (GFKIT2)

Step 1

Tip or invert stand on concrete base with elbow mount holes to front. Hand tighten 4 legs into couplings, then torque 1/2 to 1 full turn with pipe wrench. The stand can be levelled by adjusting leg heights.

Step 2

Before setting stand right side up, slide drip tray frame down front legs: tighten set screw to hold in place. Place in prepared location, (containment vessel). Adjust drip tray to desired height; tighten. Insert drip trays in frame.

Step 3

Stack one tank on top of assembled stand with bulkhead and fill port facing outward. Align front of tank with front edge of stand (front edge has pre-drilled holes). Stack & interlock each additional tanks, using top and bottom molded grooves.

Step 4

Bolt elbow(s) to the stand's pre-drilled holes.

NOTE: If assembling a Wall-Stacker System, place the wall straps over the top and front of the tank(s). Bolt to bottom of the wall straps to the tank's stand prior to bolting the elbow into place. The top of the wall straps can later be bolted to the wall once the entire system is assembled and positioned in place.

Step 5 IMPORTANT: DO NOT OVERTIGHTEN. Maximum Torque 60 ft. lbs. Hand tighten only.

Apply thread sealant to:

- A) Dispense valve (FOR BOTTOM TANK). Hand tighten into bottom tank bulkhead.
- B) Dispense valve (FOR STACKED TANKS). Hand tighten into front of elbows on stand.

Step 6

Apply thread sealant to 90° barb. Hand tighten into stacked top tanks bulkhead fitting (not bottom tank). Torque until facing five o'clock position.

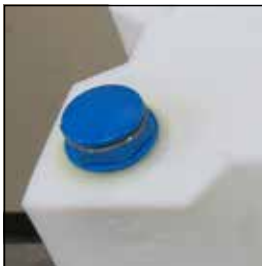

Step 7

Cut tubing to length, if needed. Place a clamp on each end. Using a screwdriver, secure tubing onto upper tank's 90° barb and the other end onto stud barb.

Remote Fill Kit (RFKIT) Assembly

Tools Needed: Flat-head Screwdriver, 9/16" Wrench

Steps 1-5 Before stacking the upper most poly tank on the system:

Steps 6-7 Complete the Remote Fill Assembly

Step 1

Remove the 2" metal cap from the top of the tank and in its place thread in the included 'blue' Vacuum Breaker.

Step 2

Remove the 2" plastic cap from the top tank's angled fill port and in its place thread the 2" 90° 'black' elbow. Orientate the elbow to face towards the side of the tank.

Step 3

Apply sealant to the 1-1/2" 90° 'black' barbed elbow and thread it into the 2" elbow threaded in the previous step. Orientate the elbow so the barbed end points to the bottom of the tank.

Step 4

Slide one end of the hose over the barbed end of the elbow; secure with hose clamp.

Step 5

Stack the tank at the top of the system and complete the Gravity Feed Assembly Instructions. (Left).

Step 6

Attach the main RFKIT preassembled component (ball valve, hose barb, elbow, and quick connect) to the leg of the stand using the included u-bolts, washers, and nuts.

Step 7

Slide the end of the hose over the barbed end of RFKIT preassembled component and secure with a hose clamp.

Fluidall, LLC Exclusive Manufacturer's Limited Lifetime Tank Warranty

TOTE-A-LUBE / *Wall-Stackers* / **CUBETAINER** / *Slimtainer*

As a result of our superior quality control standards, Fluidall offers a Manufacturer's Limited Lifetime Warranty on our Tote-A-Lube, Wall-Stackers, Cubetainer and Slimtainer rotationally molded storage tanks.

- Limited Warranty.** Fluidall, LLC ("Fluidall") warrants to the original customer that our rotationally molded storage tanks (the "Tanks") will be free from defects in workmanship and materials, under normal use and service, for the serviceable lifetime of the tank starting on the date of shipment from our factory. Fluidall's SOLE OBLIGATION and customer's SOLE REMEDY in the event of a defect covered by this warranty will be, at Fluidall's option, to (a) replace or repair the defective Tank, or (b) refund to customer the purchase price paid by customer for such defective Tank.
- Suspension of Warranty.** Should the customer not pay for a Tank in full as due, Fluidall's warranty shall be deemed suspended until such time as Fluidall receives payment in full for such Tank.
- Obvious Defects.** The carrier and Fluidall must be notified in writing of any and all damage that is discoverable upon a visual inspection of the Tank when it is received and any missing parts or accessories within seventy two (72) hours of receipt of Tank. Any and all such omissions or damage must be noted on the Bill of Lading.
- Installation.** Customer's installation and use of the Tank must comply with all applicable federal, state, and local regulations, and must be in accordance with applicable instructions and limitations contained in Fluidall's Usage and Handling guidelines for the Tank and Fluidall's chemical specific recommendations. Normal maintenance and repair shall be performed by the customer. By accepting delivery of the Tank, the customer accepts full responsibility for providing secondary containment appropriate and adequate for the stored material.
- Warranty Exclusions.** THIS WARRANTY SHALL NOT APPLY TO any Tank that after leaving our factory.
 - Has been repaired or altered in any manner not authorized in writing by Fluidall.
 - Has been damaged in transit or has been subject to abuse, misuse, fire, accident, improper or careless handling or neglect.
 - Has not been used in accordance with Fluidall's chemical resistance recommendations.
 - Has not been serviced and maintained as in accordance with the written instructions provided by Fluidall.
 - Has been exposed to pressures greater than atmospheric pressure.
 - Has been exposed to internal or external temperatures greater than 120° F.
 - Has been connected, installed, adjusted or used other than in accordance with the written instructions provided by Fluidall.
- Warranty Disclaimers.** THIS LIFETIME LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES AND GUARANTEES, WHETHER EXPRESSED OR IMPLIED, INCLUDING STATUTORY WARRANTIES, SUCH AS WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND/OR NON-INFRINGEMENT AND INCLUDING ANY WARRANTIES ARISING FROM COURSE OF DEALING, USAGE OF TRADE OR OTHERWISE.
- Limited Remedies.** Fluidall's sole liability and the original customers' sole remedy for breach of warranty shall be limited to the remedies provided in Paragraph 1 above. UNDER NO CIRCUMSTANCES SHALL FLUIDALL BE LIABLE TO CUSTOMER OR ANY PERSON CLAIMING THROUGH CUSTOMER FOR SPECIAL, INDIRECT, INCIDENTAL, PUNITIVE OR CONSEQUENTIAL DAMAGES OF ANY DESCRIPTION WHETHER ARISING OUT OF WARRANTY (INCLUDING, WITHOUT LIMITATION, LIMITED WARRANTIES) OR ANY OTHER CONTRACT, NEGLIGENCE OR OTHER TORT OR OTHERWISE. Fluidall also disclaims all liability, whether in contract, tort, warranty or otherwise, to any party other than the original customer.
- Entire Warranty.** This warranty constitutes the full understanding between Fluidall and the original customer regarding the Tanks, and no terms, conditions, understandings, or agreements purporting to modify or vary the terms of this Warranty shall be effective unless made in writing and signed by an authorized representative of Fluidall.
- Limitation of Liability.** In no event shall Fluidall's liability on any claim for damages arising from or connected with the sale, manufacture, delivery or use of the Tanks exceed the purchase price of the Tank. All legal actions for breach of this lifetime limited warranty must be commenced on or before the expiration of one year from the date of such breach. Otherwise, such action shall be considered barred by a period of limitations established by agreement.
- Warranty Procedure.** In order for the Lifetime Limited Warranty to apply, Fluidall must be notified in writing of any alleged defect or fault discovered by the customer within seven (7) days of its occurrence and Fluidall must be given the opportunity to inspect the alleged defective Tank within thirty (30) days of such notification. Fluidall may require the return of the alleged defective Tank to establish the claim. Upon Fluidall's written authority, customer shall return the alleged defective Tank (or portion of the alleged defective product as instructed by Fluidall) to Fluidall for inspection, freight and insurance prepaid by customer. ANY UNAUTHORIZED SHIPMENT OR SHIPMENT CONTRARY TO FLUIDALL'S INSTRUCTIONS WILL VOID THIS LIFETIME LIMITED WARRANTY. Final disposition of any warranty claim will be solely determined by Fluidall. Any attempted repair of a Tank by customer without Fluidall's express, prior written consent WILL VOID THIS LIFETIME LIMITED WARRANTY.

If you have questions about this lifetime limited warranty or have a defective Tank to report, and to receive a shipment authorization number, call or write customer service:
